10 Commitment to Growth

WELCOME TO OUR COMPANY

IBF-Mining is a forward-thinking mining company specializing in the exploration, extraction, processing, and supply of mineral resources. We operate with a strong focus on efficiency, safety, sustainability, and regulatory compliance, delivering high-quality mineral outputs to local and international markets.

Our operations combine industry expertise, modern mining techniques, and responsible resource management to ensure long-term value creation for stakeholders, partners, and host communities.

VISION & MISSION

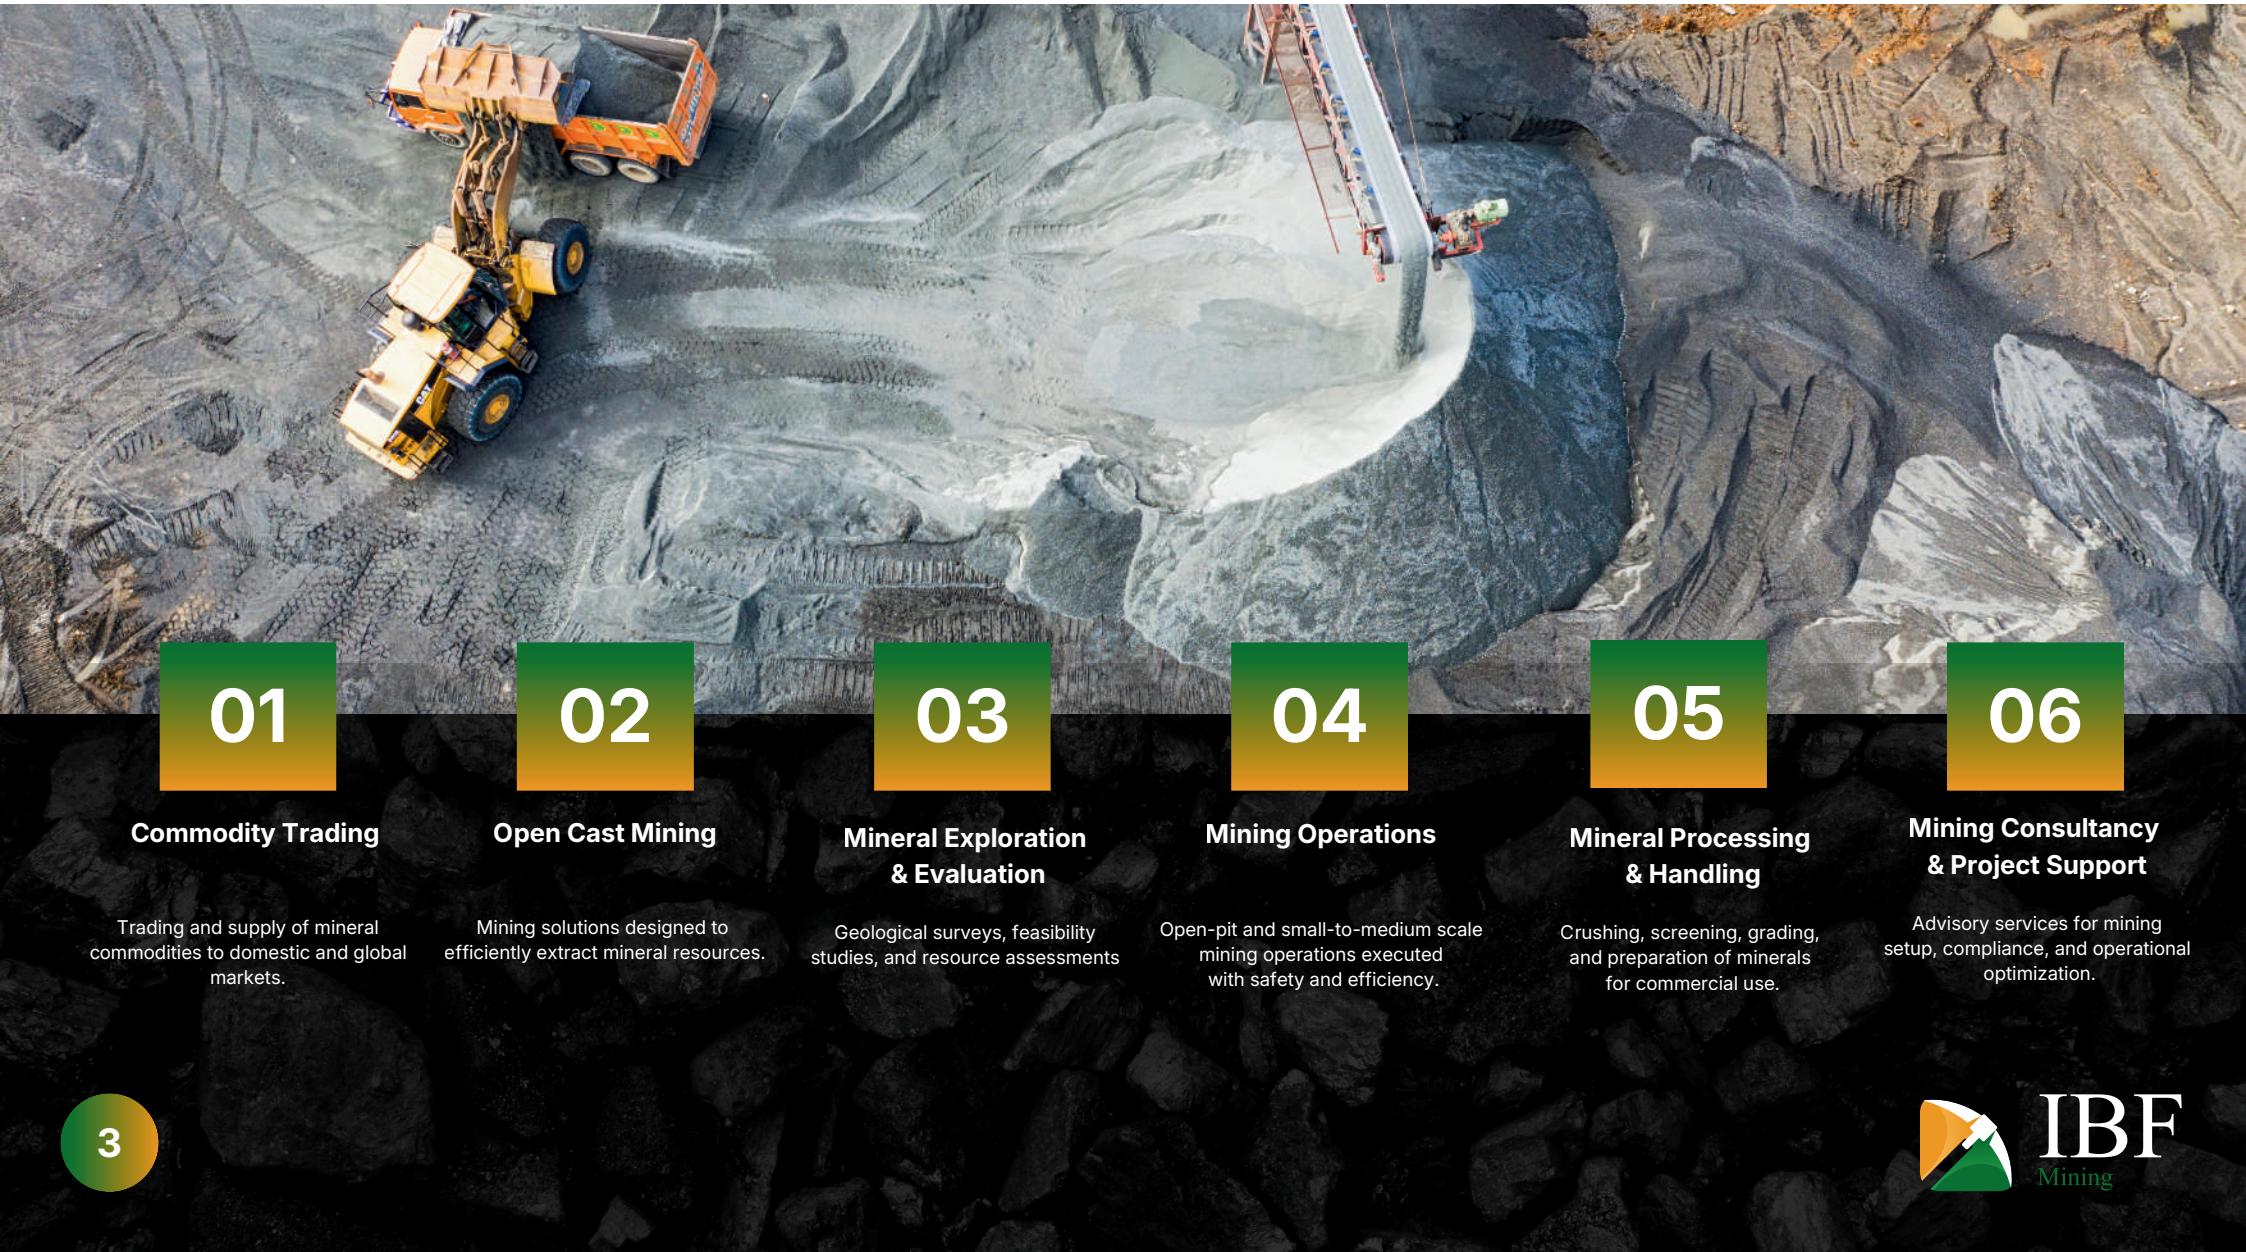

Our Vision

To become a trusted and competitive mining partner recognized for operational excellence, ethical practices, and sustainable mineral development.

Mission

To responsibly unlock mineral value through efficient mining operations, advanced processing methods, and strong partnerships—while maintaining environmental stewardship and community development.

Core Services

01

Commodity Trading

Trading and supply of mineral commodities to domestic and global markets.

02

Open Cast Mining

Mining solutions designed to efficiently extract mineral resources.

03

Mineral Exploration & Evaluation

Geological surveys, feasibility studies, and resource assessments

04

Mining Operations

Open-pit and small-to-medium scale mining operations executed with safety and efficiency.

05

Mineral Processing & Handling

Crushing, screening, grading, and preparation of minerals for commercial use.

06

Mining Consultancy & Project Support

Advisory services for mining setup, compliance, and operational optimization.

Commodity Trading

Trading and supply of mineral commodities to domestic and global markets, including contract negotiation, pricing support, volume aggregation, and buyer-seller facilitation. IBF-Mining focuses on transparent, compliant, and efficient commodity transactions aligned with market demand.

Open Cast Mining

Comprehensive open cast (surface) mining solutions designed to efficiently extract mineral resources located near the earth's surface. Our services cover the full mining lifecycle, including site preparation, overburden removal, drilling and blasting, material extraction, and rehabilitation. We utilize modern, high-capacity mining equipment and proven operational practices to ensure safe, cost-effective, and environmentally responsible mining operations while maximizing production output and resource recovery.

Key Minerals

IBF-Mining is positioned to work with a range of mineral resources, including (but not limited to):

- Chrome
- Manganese
- Iron Ore
- Coal
- Gold
- Vanadium
- Platinum Group Metals

Why Choose IBF-Mining

- Industry Expertise: Skilled professionals with hands-on mining experience
- Compliance-Driven: Strict adherence to safety, environmental, and legal standards
- Operational Efficiency: Cost-effective and scalable mining solutions
- Sustainability Focus: Responsible land use and environmental management
- Reliable Partnerships: Transparent operations and long-term collaboration

Health, Safety & Environment (HSE)

Safety and environmental responsibility are central to IBF-Mining's operations. We implement:

- Comprehensive safety protocols
- Environmental impact management plans
- Responsible waste handling and land rehabilitation
- Continuous staff training and risk assessments

Markets & Partnerships

IBF-Mining works with:

- Construction and infrastructure companies
- Manufacturing and industrial clients
- Commodity traders and exporters
- Government and private sector partners

Commitment to Growth

IBF-Mining is committed to:

- Expanding mineral portfolios
- Adopting modern mining technologies
- Creating local employment opportunities
- Building long-term, sustainable mining projects
